-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Patel et al (6,484,521) in view of Roche et al (2003/0098341).

Patel et al discloses applicants' basic inventive concept, a spray cooling system for an electronic device which controls the spraying, and the spray pattern, in relation to the sensed temperature of the electronic device, substantially as claimed with the exception of increasing the distance between the spray nozzle and the cooled device to control the amount of heat transferred to the device if the device temperature is too low and decreasing the distance if the temperature is too high. Roche et al shows this

feature to be old in the paragraph 77. It would have been obvious to one of ordinary skill in the spray cooling art from the teaching of Roche et al to modify the spray cooler of Patel et al by changing the distance between the cooled device and the spray nozzle to improve control over the temperature of the device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dvirka shows a cooling system with controllable nozzles to control heat transfer. Ravenet et al shows a spray cooler with adjustable nozzles.
